## The Smart Way to Trim

Green Atlantic PVC trim boards, mouldings, sheets and corners are a durable and cost-effective alternative for your next project.

- With Green Atlantic PVC products, you don't have to worry about decay, rot or insect damage.
- Our products can be used anywhere wood can be used. They don't have to be painted, but hold up well to paint if you choose.
- Deforestation is unnecessary for manufacturing, the PVC can be recycled, and it has an extended useful lifespan compared to wood.

## High Quality & Affordable

Green Atlantic PVC envisions a future that is sustainable and prosperous. We are focused on creating long lasting products that are high quality and reasonably priced. Not cutting corners is a simple and effective business model that allows us to feel good about what we do. Quality control is undoubtedly important in the manufacturing process of Green Atlantic PVC products and will continue to be imperative to our future company success.

When you buy Green Atlantic PVC building products, you can alleviate any doubt that you might have about the quality of the products you are using. Consistency is unequivocally essential when it comes to creating a masterpiece, which is why Green Atlantic PVC is striving to become the most trusted brand in PVC manufacturing.

## Durable & Versatile

Green Atlantic sheets come up to 20' in length and can be used for a variety of applications. From building custom columns to sheathing a house, PVC sheets are a great alternative to traditional building materials. The rot resistant characteristics of Green Atlantic PVC make for a sustainable future that is so intrinsically important to us all.

Sheet goods are also used in many other applications including signage, boat building, and furniture manufacturing. Green Atlantic can supply large quantities of PVC for any of these industries.

Green Atlantic sheet goods are always free from dents, scratches, and damaged corners. Taking pride in what we do is important to our company and its values. You can always rely on Green Atlantic to have a quality product.

# Sheet

Green Atlantic sheets are lightweight, versatile, and durable. This makes them ideal for use in many applications such as advertising, cabinet making, and construction.

The robust surfaces and high durability make them suitable for interior and exterior applications. Sheets can be manufactured into many different lengths and thicknesses for custom ordered applications.

# Skirtboard

Green Atlantic skirtboards are a great way to start off your siding project! Our skirtboards come with a flanged top, designed to go behind your first course of siding. There is no need to use a drip cap when starting with a Green Atlantic skirtboard.

Not only does our skirtboard tuck behind your siding to protect your house from water, but it is cut with a sloping angle which deflects water away from your house.

Green Atlantic makes this skirtboard available in multiple widths, which allows you to achieve your desired look.

# Custom Sizes

Green Atlantic PVC currently comes in many different widths, lengths, and thicknesses. We understand that our stock sizes may not always fulfill the demands of a rapid growing market. If you have a specific request for something that we do not currently offer, Green Atlantic can produce many custom sizes and profiles.

Whether you are using our PVC for building or manufacturing, we can help grow your company with our ability to create sizes and profiles specifically tailored to you. Sign manufacturing, cabinet making, boat building, and store displays are just a few examples of where Green Atlantic PVC can be used.

Minimum order quantities may be required for custom orders. All Green Atlantic PVC must be purchased through a certified Green Atlantic dealer. For more information on where to buy Green Atlantic PVC email [info@greenatlanticpvc.com](mailto:info@greenatlanticpvc.com).
